

## Pathways

- |   |                                   |
|---|-----------------------------------|
| ● AA central (Ala/Asp/Glu, Gly/Ser/Thr) | ● Lipid metabolism                |
| ● AA other                              | ● Mitochondrial transport         |
| ● BCAA metabolism (Val/Leu/Iso)         | ● Nitrogen disposal               |
| ● Energy metabolism                     | ● Terpenoid Backbone Biosynthesis |
| ● Extracellular Transport               |                                   |
